

EUGENE BENADE

SUMMARY

Strategic Lead Web Developer with strengths in team leadership and quality assurance. Drives continuous improvement through effective code reviews and fosters a culture of collaboration within the development team. Delivers high-quality web solutions aligned with business objectives.

EXPERIENCE

Lead Developer, 09/2023 - 04/2026

Offerforge - Pretoria, South Africa

- Conducted code reviews to maintain high standards of code quality and facilitate knowledge sharing among team members.
- Investigated requests for maintenance and repairs for swift resolution.
- Implemented security measures in software designs, safeguarding data integrity and confidentiality across systems.
- Optimised application performance through rigorous analysis and refactoring, significantly reducing loading times.
- Mentored junior developers, providing guidance on best coding practices and professional development.
- Oversaw the transition of legacy systems to modern architectures, minimising disruption and maximising efficiency.
- Deployed software updates and patches, minimising downtime and protecting systems against security vulnerabilities.
- Utilised React framework to build dynamic and interactive web applications.
- Customised content management systems to meet specific client needs, enabling easier website updates.
- Utilised Laravel framework to streamline development processes and improve application functionality.
- Facilitated regular team meetings to discuss progress, address challenges, and plan future development phases.

PHP Web Developer, 05/2012 - 09/2023

OfferForge - Centurion, South Africa

- Utilised JavaScript, HTML, and CSS to create interactive and visually appealing web pages.
- Analysed website traffic and user engagement metrics to guide improvements, increasing visitor retention rates.
- Optimised application for maximum speed and scalability, significantly reducing page load times.
- Developed and maintained responsive website designs, improving user experience across various devices.
- Delivered clean, error-free code matching project scope and minimising performance issues.
